Medium Wave Dryer

Features Include:

- High intensity medium wave lamp panel
- Easy to adjust lamp intensity dials
- Easy maintenance design
- Simple lamp replacement
- Increase in production
- Extremely reliable and years of dependability

Performance

- The medium wave drying system increases production by speeding up ink oxidation.
- Reduces the amount of spray-powder.
- Higher quality image.
- This system has proven extremely reliable and will provide years of dependability.

Control

The medium wave drying system is manually controlled by adjusting the lamps with a dial from 0% to 100%.

All control panels are UL listed under UL508A guidelines, insuring safety and quality in every system.
